

Customer Testimonials

"I am very much impressed with ALIO Industries precision nano technology positioning stage. **It is the most precise positioning stage I have calibrated in the last 18 years.** I can truly say without hesitation, I will now be able to recommend a company with nano-precision positioning accuracy with verified and proven technology in the field. I am extremely excited about the upcoming product line and equipment ALIO Industries will be unveiling and promoting in the market place in the future."

- *Michael Schraufnagel, CEO
Quality Tech Services*

Note: QTS is utilized and authorized by major machine/tool builders and manufacturers and is an authorized calibration vendor for OEM Machine Tool Builders, Aerospace, Aircraft & Automotive Manufacturers, Renishaw and Hamar Laser, Boeing, Vought, Delta, Northwest Airlines, Pratt & Whitney and NASA Space Program Suppliers.

Customer Testimonials

“With the development of our 1-picoliter jetting capability for materials deposition, new tools were needed to test and verify print head performance against application requirements. **We undertook this joint development with ALIO because there were no tools available to meet our stringent requirement. We are pleased by the results of our collaboration and meeting of our design objectives”**

*Dan West
Systems Engineering Manager
FujiFILM-Dimatix*

“ALIO is delivery nano while everyone else is just talking about it.”

Customer Testimonials

I wish to thank Alio for going out of their way to support this vital subsystem. I knew Alio previously as being thorough and conservative in their promises. I saw these competences confirmed in working with your engineering team over the last month. I was impressed with the field work, the competence of your staff in initially diagnosing, and later implementing the Alio subsystem in the rather complex controls and mechanical environment of the HXN. On a few hours notice, your team was able to extend their stay by one day to address an unexpected issue, and thus complete the full integration into our HXN. We highly appreciate your competence, flexibility, and the dedication to your product, as demonstrated to us.

I will recommend Alio enthusiastically in the future in the x-ray and nanoscience communities.
